## CONTEXT AND GENERAL ISSUES

The global debate on climate change is no longer limited to an environmental issue, but is now part of a broader vision that closely links environmental objectives with economic and social development goals.

Controlling climate change has become one of the most important issues on the international and national policy agendas, given the acknowledged capacity of climate to affect, often negatively, economic growth and the achievement of the Global Sustainable Development Goals (SDGs).

The choice of measures to be taken will have to be part of a new dynamic that combines the demands of short-term profitability with the imperatives of sustainable growth, closely associating the economic, environmental and social dimensions. A reorientation of public policies and investments will be necessary to take into account the objectives of mitigating GHG emissions and the imperatives of adapting to the growing impacts of climate change.

Integrating climate action into the development process offers a means to streamline and improve the efficiency and impact of the use of financial resources, in a global crisis context.

More than ever, growth and sustainable development require the mitigation of the effects of climate change and the protection of the natural environment and its resources. These challenges are closely linked and require simultaneous responses through integrated policies, appropriate financing choices, social dialogue and effective cooperation.

In this context, the important contribution of the private sector in promoting innovation and financing is fundamental to support environmentally friendly growth.

In order to best adapt to the emerging demands, Africa will have to change its approach to

development, consider new integrated and rational strategies, make the necessary socio-economic adjustments by focusing on developing its technical capacities, increasing the level of public investment and supporting the transformation of its economic fabric to stimulate private investment.

In Tunisia, the state is committed to the global process of combating climate change and to respecting sustainability in its economic development model. Indeed, within the framework of the Paris Agreement, Tunisia has raised its climate ambition and seeks to reduce its GHG emissions by 45%. This commitment comes in the context where Tunisia has put in place a low carbon strategy resilient to climate change by 2050. This strategy even aims to be carbon neutral as soon as possible (by 2050 if resources are mobilized).

In Tunisia, the updated National Determined Contribution (NDC) in 2021 will require the mobilization of significant financial resources, estimated at around 19.4 billion USD over the period 2021-2030.

The role of the private sector in the fight against climate change and in the ecological transition is becoming increasingly important. Indeed, about 70% of the resources needed to achieve the Tunisian NDC should come from a real and effective engagement of the private sector in the promotion of green, sustainable and climate-aligned investment.

## OBJECTIVES OF THE SESSION

- Discussions on global and regional ecological and socio-economic climate issues, and highlight the key role of the private sector in ensuring transformational change in global and regional development,
- Sharing experiences of financial institutions, support mechanisms and cooperation to promote clean private investment aligned with the Sustainable Development Goals (SDGs) and climate issues, at global, regional and national level (Tunisia).
- Presentation and discussion of the private sector effort and its role in the implementation of the SDGs and climate policies,
- The role of technological innovation and startups in enhancing climate ambition and achieving climate targets.

## ORGANIZERS

- Ministry of Environment
- Partners :
  - International Labor Organization (ILO)
  - Global Pact
  - Council of Banking and Finance (CBF)

## PROVISIONAL PROGRAMME OF THE SIDE EVENT

### 8.00-08.30 : Welcome and registration of participants

Participants and panelists are invited to fill in the Participation Form with all the necessary information and send the Participation Form to the organizers by 10 August 2022 (zmerli\_mohamed@yahoo.com), in accordance with the rules and procedures applicable to participation in TICAD 8. This procedure is mandatory to gain access to the TICAD8 meeting venue.

All panelists and participants, attending in-person, are invited to present themselves on 26 August 2022 at 8.00 a.m. at the latest, for a better application of the sanitary procedures related to Covid-19 (rapid tests, registration, badging).

### 08:30 - 09:00: Opening session and introductory messages

Moderator: Mr Mehdi Kettou

Welcome and introductory remarks:

- **Mr. Pablo Vieira**, Global Director – NDC - Partnership (pre-recorded message),
- **Mr. Carlos Manuel Rodriguez**, Global Environment Facility CEO and Chairperson (pre-recorded message),

Key messages, Keynotes,

**SE. Madame Leila Chikhaoui Mahdoui**, Minister of Environment, Tunisia

### 09.00 - 10.00 Session 1: Global and regional policies and initiatives for sustainable and climate-aligned investment development (60 minutes)

Presentations will be made in PowerPoint format, in French or English, translation will be available. Allow a maximum of 10 minutes for each presenter).

**Moderator : M. Mehdi Kettou**
